

TECHNICAL SAFETY POLICY

The DO-MET Technical Safety Policy is intended to present the company's focus on the operational safety of the services offered as well as its approach to safety during the production of components for the railway market.

The company's safety goals are:

- Production of high-reliability components,
- Development of awareness and competences of employees,
- Preventing negative impacts on the environment.

The Management Board developed the Technical Safety Policy based on the following principles:

- Principle of accepting only orders for which there is full confidence that the company will meet all the customer's quality requirements,
- Shaping long-term partnerships with suppliers and contractors on the basis of mutually beneficial cooperation,
- Stability of production processes and continuous development of technological equipment and technology,
- Compliance of the developed technical solutions with the requirements and regulations, technical and normative documentation as well as customer requirements and legal regulations.
